# Copyright & Author Rights

---

# Copyright

- U.S. Copyright Law – Balance between copyright and fair use
- As soon as an article/book is written (tangible format) – copyrighted
- Not have to be registered with U.S. Copyright Office

# Copyright continued

Gives exclusive control of how work is:

- Reproduce
- Distribute
- Make derivatives (adaptions)
- Publically perform or display

As an author you own these rights unless you transfer your rights

# Author Rights

- Part of the larger issue of Scholarly Communication
- Bundle of rights
- Traditional publishing

# Which Rights Should I Retain?

By retaining certain rights for your articles, you are taking back control of your own scholarly output.

- ◉ Posting copy on your website
- ◉ Distributing to students and colleagues
- ◉ Using portions or all in future publications
- ◉ Adding to institutional or subject repository

# How Do I Retain Certain Copyrights?

- ◉ Modify the agreement supplied the journal publishers – Author Addendum
- ◉ Author Addendum may serve as a useful starting point

# More Information

- ◉ Author Rights brochure (Rod Library)
- ◉ Scholarly Communication website (Rod Library)
- ◉ UNI Copyright website (UNI Copyright Committee)

# Fair Use Copyright

## Four Factors

- ◉ The purpose and character of your use,
- ◉ The nature of the copyrighted work,
- ◉ The amount and substantiality of the portion taken, and
- ◉ The effect of the use upon the potential market

# Linking – eLearning

## WHY

- Article linking – Takes things out of the area of copyright. It is now a licensing issue.
- The link takes the student into the database, directly to the article bypassing the entry database screens.

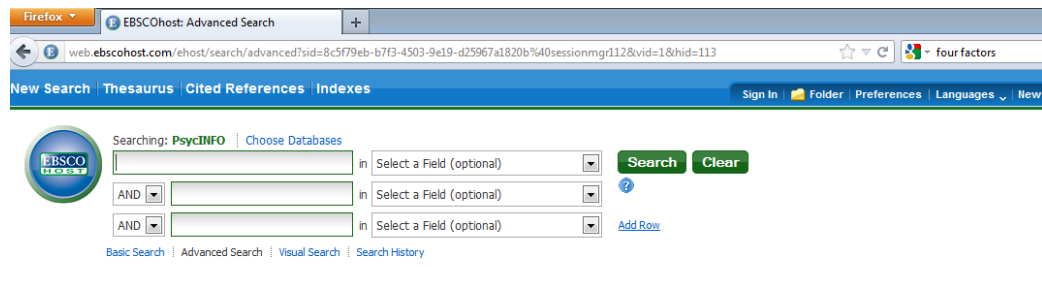

**Databases,  
Journals,  
Articles,  
and ebooks**

**Link to in  
eLearning**

---

# Database Level Linking

- Panther Prowler (Subject categories)
- Databases A-Z (Alphabetical list)
- Link to *individual databases* (OWL website)

The screenshot shows a Firefox browser window with the address bar displaying the URL: [web.ebscohost.com/ehost/search/advanced?sid=8c5f79eb-b7f3-4503-9e19-d25967a1820b%40sessionmgr112&vid=1&hid=113](http://web.ebscohost.com/ehost/search/advanced?sid=8c5f79eb-b7f3-4503-9e19-d25967a1820b%40sessionmgr112&vid=1&hid=113). The page title is "EBSCOhost: Advanced Search". The navigation bar includes links for "New Search", "Thesaurus", "Cited References", and "Indexes", along with "Sign In", "Folder", "Preferences", and "Languages". The main search area features the EBSCO logo, a search input field containing "PsychINFO", and a "Choose Databases" link. Below the input field are three rows of "AND" connectors and "Select a Field (optional)" dropdown menus. To the right of these fields are "Search" and "Clear" buttons. At the bottom of the search area are links for "Basic Search", "Advanced Search", "Visual Search", and "Search History".

# Journal Level Linking

- Use the *Article Locator* feature – The link is generated by the library linker.

# Determine If Rod Library has Access to an Article

- Go over handout – List of sample article to search

## Question

- Does Rod Library have online access?
  - Step #1 – Use Google Scholar ([scholar.google.com](https://scholar.google.com))
  - Step #2 – Use the *Article Locator* feature

# Article Linking

## Two Methods

- ❖ Open URL link – Look like the library linker  
Use the *Article Locator* feature
- ❖ Deep link to article within database
  - Find stable URL
  - Proxify article URL – for off-campus access

Web page (directions):

<http://www.library.uni.edu/distance-learners/proxifying-urls>

# Open URL Method

- Use the *Article Locator* feature to generate URL
- Not a direct link to the article. These links can change over time and sometimes the links don't work. On the other hand, this type of link pulls all points of access for the article into one location.

# Deep Linking to Article

- Find stable URL
- Add proxifying string of text

<https://login.proxy.lib.uni.edu/login?url=>

Links directly to the article. Have to know the 2 step process. If content is taken out of the database, the link may be broken.

# Electronic Books - ebooks

- UNISTAR (library catalog)
- ebrary – (Databases A-Z)

For books before 1923

- Google Books
- Hathi Trust

# ebooks UNISTAR

The logo for UNISTAR Library Catalog is displayed within a purple rectangular box. The text "UNISTAR Library Catalog" is in a bold, yellow, sans-serif font. Below it, in a smaller, white, sans-serif font, is the text "A Cedar Valley Library Consortium Member".

**UNISTAR Library Catalog**  
A Cedar Valley Library Consortium Member

- Conduct a Specialized search
- Conduct a targeted Keyword search
- Conduct a Advanced search

1<sup>st</sup> - Find book

2<sup>nd</sup> - Find link

3<sup>rd</sup> – *Right click* and *copy link* (ebook links are already proxified in UNISTAR)
