To focus your searches using OneSearch try the following commands:

* farm* finds articles with the word farm, farms, farming, farmer, etc.
OR farming OR agriculture finds articles that contain either of these words
AND water AND climate finds articles that contain both “water” and “climate”
“” “water pollution” finds the exact phrase

Another powerful technique is to search for your topic in the title of articles. To do this change the dropdown menu in the Advanced Search from “Keyword” to “Title”.

For the following search example the phrase “climate change” must appear in the title of the article as must some version of farming or agriculture.

Title contains "climate change"
AND Any field contains agricultur* OR farm*

After you’ve searched:

1. Change the Publication Date (select date then click on Refine)
2. Then choose Peer-reviewed Journal
3. Then click on Apply Filters
