The following databases index journal articles and other resources in the area of Education. Some of the databases contain full text journal articles, or there are links to full text articles (click on the yellow Find It button). These databases are located on the Rod Library home page, http://www.library.uni.edu, under the “OneSearch!” tab, and then under “Databases A-Z.” You may also use OneSearch! to search several databases at once.

OneSearch!
OneSearch! is a tool for searching most of Rod Library’s resources. It is located near the top of the Rod Library home page. Be sure to search OneSearch in the Advanced Search mode to allow for the use of Boolean Operators (AND, OR, NOT) and searching by Title or Subject. Search results can include articles from journals, magazines, and newspapers; books; government publications; and other resources such as DVDs. Search results can be fine-tuned using facets such as source types. Expanders and limiters can be used to increase or decrease what’s being searched. Limiting to peer reviewed journals is possible.

PsycInfo
This resource indexes and abstracts articles from about 1,300 journals and book chapters in the area of psychology and related behavioral and social sciences. It is especially strong in educational psychology. PsycInfo does not contain full text journal articles, but some of the articles in PsycInfo are available full text in other databases that the Library subscribes to. Thesaurus. Limiting to peer reviewed journals is possible.

PsycArticles
This is the full-text database of the journals published by the American Psychological Association. These journals are also indexed in PsycInfo, and search results in PsycInfo will have links to full text in PsycArticles (if available).

ERIC (EBSCO)
ERIC is a comprehensive database which covers all areas of education. It indexes and abstracts articles from about 800 education and related journals. It also indexes and abstracts documents such as research reports, bibliographies, curricular materials, and conference papers. Some of the ERIC Documents (ED) are available full text online while others are available on microfiche in the
Microforms Area. ERIC does not usually contain full text journal articles, but some of the articles in ERIC are available full text in other databases that the Library subscribes to. Thesaurus. Limiting to peer reviewed journals is possible.

**Education Full Text**
Covers all areas of education and indexes about 400 English-language periodicals, yearbooks, and monographs in series. It contains abstracts and, for recent years, the full text of articles from about 200 journals and magazines. There is substantial overlap with ERIC. However, the full-text feature and the number of journals that are only indexed in this abstract make it a useful complement to ERIC. Thesaurus. Limiting to peer reviewed journals is possible.

**Academic OneFile and Academic Search Elite**
These databases index periodicals in many subject areas, including education. Approximately half of the articles are full text. Neither have a thesaurus, but both contain subject guides. Limiting to peer reviewed journals is possible.

**Web of Science (ISI)**
An index to articles and references in over 8,500 journals. It includes the Social Sciences Citation Index and allows for “cited by” (Snowball Forward) searching.

**Google Scholar, [http://scholar.google.com](http://scholar.google.com)**
Indexes journal articles and books and contains “Cited by” links. A free service provided by Google. Be sure to either enter Google Scholar on the library homepage or via "Databases A-Z" so that you have all the linking capabilities to full text journals. Google Scholar also allows for “cited by” (Snowball Forward) searching.

You can consult [Ulrichsweb.com](http://ulrichsweb.com) to see whether a journal is peer reviewed.
